

1

Let's find a place where you think, "It would be interesting if there were a creature!"

note

2

Can you look around the place carefully and find any food the creature wants to eat.

note

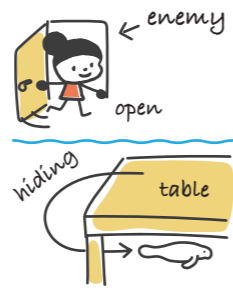

3

What are your ideas for how the creature catches and hunts food?

note

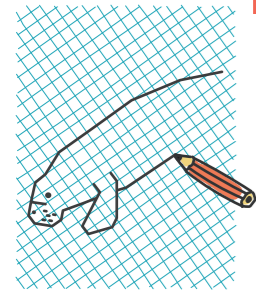

4

What kinds of enemies are there, and how does the creature protect itself?

note

5

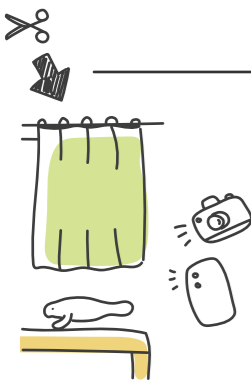

Now we know
• Where your creature lives
• What your creature eats
• How your creature catches food
• How your creature protects itself
Let's give a shape to your creature and draw a picture!

What is the name of your creature?

name

6

Let's cut out your drawing with scissors and take a photo by placing it where your creature lives. (Don't forget to include the name tag!)

7

What would the creature

do after eating all the curtains?

note

Please think of any challenges the creature would experience living in this place.

8

Would you buy new curtains?
Would you look for other food?
Would you move to another place?

What would you do to solve the challenges if you were your creature?

note

9

Please share your creature with us! If you use social media, with your guardian's permission or help, let's post the photo with "#DiscoverYourOwnCreature."

We are happy to share your creature at our website.
